

ServiceNow Script-Controlled ACL Project

Module 1 – Users and Custom Roles

Lab duration: 3 hours | Development/Training Instance

Objective

Create the test user and the four custom roles required for the ACL lab.

User Creation

1. Log in to the ServiceNow instance with administrator access.
2. Navigate to **User Administration** → **Users**.
3. Click **New**.
4. Enter User ID: **EEE User**.
5. First name: **EEE**; Last name: **User**.
6. Email: **eeeuser@gmail.com**.
7. Save the record.

Role Creation

Navigate to **User Administration** → **Roles** and create these roles:

- **bb1** – Read access role
- **bb2** – Create access role
- **bb3** – Write access role
- **bb4** – Delete access role

Assign all four roles to EEE User. In the final test, the roles can be assigned together or incrementally to verify each permission stage.

Verification

Open the EEE User record and confirm that bb1, bb2, bb3 and bb4 are assigned.
