

ServiceNow Script-Controlled ACL Project

Module 2 – Institution Details Table

Lab duration: 3 hours | Development/Training Instance

Objective

Create the custom table that will be protected by the ACLs.

Create Table

Navigate to **System Definition** → **Tables** and click **New**.

Label: **Institution Details**

Name: **u_institution_details**

Extends table: **False**

Click **Submit**.

Create Fields

Add these fields to **u_institution_details**:

- Student Roll Number – Auto Number
- Student Name – Reference to User
- Faculty Name – Reference to User
- Branch – Choice: ECE, EEE, CSE
- Email – String
- Phone Number – String
- Description – Multi Line String

Verification

Create several records with different Branch values, including EEE, ECE and CSE. This data set is used to test record-level access.
